Introduction:

The ENFORCER Mini PTZ Camera is a compact full-featured PTZ (pan/tilt/zoom) CCTV camera. In as little as one second, the camera can pan a full 360 degrees, tilt up to 90 degrees, or auto-flip 180 degrees. It also features an optical zoom of up to 12x and a digital zoom of up to 16x, providing a clear view of the entire protected premises. The 1/4" Interline Transfer CCD provides high-resolution, 600 TV Line images in light as low as 0.2 Lux for color use and 0.04 Lux for black and white use. A small size and a wide range of mounting brackets make the ENFORCER Mini PTZ Camera ideal for almost any installation.

The Mini PTZ Camera is controlled with a keyboard controller or a DVR that uses RS-485 for communicating between the devices.

Features and Functions:

Powerful and Flexible: The ENFORCER Mini PTZ Camera is equipped with a 1/4" CCD, a powerful Day and Night function with mechanical ICR, up to 192x zoom (max. 12x optical zoom and 16x digital zoom), multiple focus modes, and other fully programmable features.

Pan/Tilt Functionality: The camera features 360° endless pan motion and 90° tilt. It can be programmed to automatically flip the image if it tilts under the unit. The pan/tilt function uses vector drive technology to quickly move to the target while ensuring the view on the monitor flows smoothly.

On-Screen Display (OSD): The On-Screen Display shows camera status and settings together with the preset target views.

A Wide Range of Programmable Options:

- Up to 256 preset target views, each with its own characteristics such as zoom and lens angle
- Up to four patterns for moving the camera as if it were controlled by a joystick
- Up to eight privacy masks which can be increased or decreased in size to cover certain areas to protect privacy
- Frame scan between two preset positions
- Preset cruise for scanning between the first twenty presets

Reserved Presets: Certain camera characteristics can be specified by using reserved preset configurations instead of individually configuring those characteristics.

Standard PTZ Control: Works with Pelco-D or Pelco-P compatible controllers via an RS-485 connection.

Auto-Flip: Vertically inverts the image if the camera tilts below its center.

Parking Action: Should no operator-activated or automated camera action occur during a specified time (programmable from 15 to 250 seconds), the camera automatically moves to a pre-determined preset position or any pre-programmed pattern, frame scan, or other scan function.

Smart Power-Up: The camera automatically moves to a pre-determined preset position or any pre-programmed pattern, frame scan, or other scan function on power-up.

Window Blanking: Up to eight privacy masks can be created to cover certain areas or objects such as windows or private houses. The masks can be adjusted for size. When the camera moves past such areas or objects, the mask automatically covers them.

Semi/Auto Focus: The focus for each preset location is manually set, and the camera automatically uses that focus when it moves to a preset location. During jog operations, the camera uses auto focus. The shift between semi-auto and auto focus occurs automatically.

ENFORCER Mini PTZ Camera

Parts List:

1x Camera	4x Short screws (for attaching camera to bracket)
1x Wall-mount bracket	4x Long screws (for attaching bracket to wall)
1x Manual	4x Screw anchors
1x Wire harness extension cord	

Specifications:

		EV-7605-NYWQ	EV-7605-PYWQ
Type		Mini PTZ Camera	
CCD		1/4" Interline transfer	
Resolution		600TVL	
Video output format		NTSC	PAL
Effective pixels		768x494 pixels	752x582 pixels
SSNR (Noise Reduction)		Low, middle, high, off	
SSDR (Dynamic Range)		Off, on	
Day/Night		Auto, Color, B/W (ICR)	
OSD Control		RS-485	
Protocols		Pelco-D, Pelco-P (automatic)	
Scanning system		2:1 Interlace	
Sync		Internal/Line-Lock	
Video output		1.0Vp-p Composite video, 75Ω	
Lens		3.94~46.05mm	
Zoom		12x Optical / 16x Digital	
Minimum illumination		Color: 0.2 Lux / B/W: 0.04 Lux	
Gamma correction		Default	
S/N Ratio		52dB (AGC Off)	
DSS (Digital Slow Shutter)		x2~x512	
Shutter control		1/60~1/120,000 s	
Gain control		Off, Low, Middle, High, Manual	
White balance		ATW, AWC, Indoor, Outdoor, Manual	
Operating voltage		24VAC	
Power Consumption	Camera only	9W	
	Camera w/ fan	10W	
	Camera w/ fan and heater	20W	
IP Rating		IP66	
Operating temperature		-4°F~131°F (-20°C~55°C)	
Dimensions		4 ¹³ / ₁₆ "x7"x4 ¹³ / ₁₆ " (122x180x122 mm)	
Cable length		31.5" (80cm)	
Weight		42.3-oz (1.2kg)	

Pan/Tilt Settings:

Range	Pan	360°
	Tilt	180°
Pan/Tilt Speed	Preset	Up to 360°/s
	Manual	0.05~360°/s (proportional to zoom)
	Swing	1~180°/s
Presets	Max. 256 presets (Label, camera image setting)	
Patterns	Max. 4 patterns	

Dimensions:

Camera

Wall-Mount Bracket

Safeguards and Precautions:

Before Starting:

1. Please read this manual carefully and keep it for future reference.
2. Use the camera within given temperature and electrical limits.
3. Do not point the camera at the sun. Heat could damage the camera, even when not in use.
4. Do not expose the camera to rain or moisture.
5. Do not install the camera in dusty or humid environments.
6. Do not mount the camera in areas exposed to radiation, strong magnetic fields, or strong electrical signals.
7. Do not open or disassemble the camera. There are no field-serviceable parts inside.
8. Do not drop the camera or subject it to strong vibrations.
9. This camera is VERY HEAVY. To prevent injury to the installer or the client, do not mount it on an unstable or improperly supported surface. When mounting, only use brackets or other mounting devices that are recommended in this manual.

Operation Precautions:

1. Only use regulated power supplies with voltage and minimum current output per the specifications of this camera.
2. If the camera gets hot or starts smoking while in use, disconnect the power immediately and contact the professional installer or dealer.

Cleaning Precautions:

1. Periodically clean the dust off the entire camera with a slightly damp (NOT WET) cloth. DO NOT USE chemical cleaners.
2. Do not move the camera while cleaning, as this could change the angle of the view.
3. If the dome cover becomes dusty, carefully clean using a slightly damp (NOT WET) cloth. DO NOT USE chemical cleaners. DO NOT SCRATCH the dome, as this will affect the quality of the video image.

Overview:

Camera Address DIP Switch and Communication Protocol Setup:

Before the Mini PTZ Camera is installed, first set up the DIP switches to configure the camera address. The communication protocol is configured automatically by the camera.

1. Remove the clear dome of the Mini PTZ Camera by turning it counterclockwise by hand.
2. Look for the DIP switch block near the base of the black plastic dome that surrounds the camera. **DO NOT REMOVE THE BLACK PLASTIC DOME.**
3. Set the camera address (8-pin DIP switch):
 - The camera address is a number from 1 to 255. The factory default camera address is "1".
 - Do not use "0" as a camera address.
 - The address of a particular camera must match the address setting of the DVR or keyboard controller.
 - To get the camera address, add the total DIP switches that are in the ON position.
 - Example: If DIP switches 1, 4, and 6 are ON then the camera address is $1+8+32=41$.

ENFORCER Mini PTZ Camera

Installation:

1. Connect the camera to either the included wall mount or another optional bracket.
2. Run a 24VAC power supply wire, a video cable with a male BNC connector, and a data wire through the wall to where the camera is to be mounted.
3. Connect the camera's video cable to the video cable coming from the wall. **Do not cut the female BNC connector of the camera's video cable as that will void the warranty.**
4. Connect the camera's RS-485 cable to the data wire cable coming from the wall.
5. Temporarily connect the camera to the power supply. **Do not cut the AC power terminal of the camera's power cable as that will void the warranty.**
6. Hold the camera's bracket against the wall or ceiling where it is to be mounted, but do not mount yet. While watching the monitor, operate the camera's pan and tilt functions to ensure that this mounting location is correct. Use a pencil to mark the location of the screw holes in the mounting bracket.
7. Disconnect the power supply from the camera.
8. Mount the mounting bracket to the wall or ceiling using the included mounting screws. If the wall is made of drywall, brick, or similar material, it may be necessary to use the included screw anchors.
9. Reconnect the camera's power supply.
10. Program the camera via the OSD (on-screen display) menus from the DVR or keyboard controller.
11. Do a final test of the video camera and monitor.

Basic Installation

Multiple PTZ Camera Installation

Pre-Operation Checklist:

Before operating the Mini PTZ Camera, please note the following:

- ✓ Double-check that the cables are properly run between the controller and camera, and that all connections are correct.
- ✓ Double-check that the camera address on the controller is the same as the address of the target camera. The camera address can be found by looking at the camera address DIP switch settings (see page 7) or through the ADDR SETTING menu in the OSD (see page 17).
- ✓ The Pelco protocol setting of the controller and the camera must be identical. The Pelco protocol setting of the camera is automatically matched to the communication protocol of the controller or DVR.
- ✓ Make sure that the camera is rebooted after the camera address setup DIP switches are changed.
- ✓ Refer to the controller or DVR manual for information on configuring or operating those devices.

Understanding and Operating Preset and Pattern Functions:

Standard Pelco-compatible controllers allow the camera operator to do several functions without going through the full OSD menu, depending on the capabilities of the DVR to which the camera is connected.

The SECO-LARM series of DVRs allows operators to do the following via the "Dome Preset" menu:

- Set the camera to remember multiple specific preset locations.
- Tell the camera to go to a specific preset location.
- Run certain preset functions, including patterns, frame scan, or preset cruise functions.
- Change certain configuration patterns.

Programming the patterns, frame scan, preset cruise, and a detailed configuration of the PTZ camera requires operators to use the OSD menu. See page 16 for more information.

This PTZ camera can be controlled by any DVR or keyboard controller which uses Pelco-compatible protocols. When using non-SECO-LARM DVRs or when using keyboard controllers, the manuals for those devices may include information on how to operate or program the PTZ camera.

To set or go to a preset location or use a preset function via a SECO-LARM DVR:

1. Press the "Dome" button. The lower left corner of the screen will change from "REC" to "DOME" to show the camera is in the Dome Control menu.
2. Press the "1" button to go to the DOME PRESET menu.
3. Use the UP, DOWN, LEFT, and RIGHT buttons to highlight your selection and press ENTER to confirm your selection.

Note: In most cases, only the GO function will work. Only the preset locations can be programmed via the DOME PRESET menu. Other functions must be programmed using the OSD menu.

4. Use the UP and DOWN arrows to switch between YES and NO. Navigate to YES, and then press the ENTER button.

See page 12 for a list of preset functions.

Configuring Mini PTZ Camera with Enforcer DR-1 Series DVR:

Step 1

Press **Dome** on the DVR front panel to access DVR controls.

Step 2

Press **1** to access the DVR preset menu.

Step 3

Use the **Up, Down, Left, Right,** and **Enter** buttons to make a selection.

Step 4

95			
1	2	3	BS
4	5	6	Set Preset
7	8	9	Go Preset
Exit	0	Clear	Run Tour

Go to **Preset 95** to access Mini PTZ OSD settings.

This will bring up the SPEED DOME CAMERA menu as shown on page 18.

Reserved Presets:

<Go Preset> [82]	Start Frame Scan function
<Go Preset> [83]	Clear all Presets
<Go Preset> [84~87]	Run Pattern function 1~4
<Go Preset> [88]	Run Preset 1~10 Cruise function
<Go Preset> [89]	Run Preset 11~20 Cruise function
<Go Preset> [90]	Run Preset 21~30 Cruise function
<Go Preset> [91]	Run Preset 31~40 Cruise function
<Go Preset> [92]	Run 360° Random Interval Scan function
<Go Preset> [95]	Enter into OSD menus
<Go Preset> [98]	Run 360° Continuous Scan function
<Go Preset> [99]	Run Preset Cruise function

OSD Display:

Operating the OSD Menus:

For operating the OSD menus, please note the following:

- To access the OSD menu from your DVR, go to **Preset 95**. For more information on DVR presets and their functions for the ENFORCER Mini PTZ Camera, please see page 11, *Reserved Presets*.
- Most commands are done on PELCO-compatible DVRs using the front panel buttons, including up, down, right, and left arrows, or via a panel-mounted joystick. Such operations may also be possible using the DVR's remote control.
- For many menu operations, the user must press the MODE or PLAY/STOP buttons. For most DVRs, these are the buttons for iris open (MODE) and iris close (PLAY/STOP), but may be marked with other words.
- For ENFORCER DR-1 Series DVRs, the operations are done as follows:
 - To navigate the menus, press the UP/DOWN/LEFT/RIGHT buttons.
 - To enter a sub-menu (except for the CAMERA sub-menu), press the MODE or RIGHT buttons.
 - To enter a sub-menu in the CAMERA sub-menu, press the MODE button.
 - To exit all menus (except for the CAMERA sub-menu), press the PLAY/STOP button.

MOTION Menu:

From MAIN MENU

This menu allows for setting different Mini PTZ movement options such as frame scan, power up operation, and park action.

- FRAME SCAN: The camera will pan between two positions at a given angle.
 - SET SCAN POSITION: Set left and right frame scan positions.
 - CLEAR FRAME SCAN: Clear the frame scan positions.
 - FRAME SCAN SPEED: Set the frame scan speed.
 - 1~32
 - BACK: Return to previous menu.
 - EXIT: Exit OSD menus.
- POWER UP: The camera will perform one of the below actions.
 - NONE: No action.
 - AUTO SCAN: Continuous clockwise scan at given tilt and zoom.
 - RANDOM SCAN: Intermittent clockwise scan at given tilt and zoom.
 - FRAME SCAN: Continuous scan between two positions.
 - PRESET 1: Move to the Preset 1 position.
 - PRESET 8: Move to the Preset 8 position.
 - PATTERN 1: Perform the Pattern 1 action.
 - PATTERN 2: Perform the Pattern 2 action.
 - PATTERN 3: Perform the Pattern 3 action.
 - PATTERN 4: Perform the Pattern 4 action.
 - CRUISE: Perform the Cruise action between Presets 1 through 20.

MOTION Menu, continued:

- PARK TIME: Idle time required before Park Action.
 - 15~250 seconds
 - PARK ACTION: The camera will perform one of the below actions.
 - NONE: No action.
 - AUTO SCAN: Continuous clockwise scan at given tilt and zoom.
 - RANDOM SCAN: Intermittent clockwise scan at given tilt and zoom.
 - FRAME SCAN: Continuous scan between two positions.
 - PRESET 1: Move to the Preset 1 position.
 - PRESET 8: Move to the Preset 8 position.
 - PATTERN 1: Perform the Pattern 1 action.
 - PATTERN 2: Perform the Pattern 2 action.
 - PATTERN 3: Perform the Pattern 3 action.
 - PATTERN 4: Perform the Pattern 4 action.
 - CRUISE: Perform the Cruise action between Presets 1 through 20.
 - REPEAT LAST: Repeat the last action.
 - DOME SPEED: Speed at which the Power Up Action and Park Action will move.

IMPORTANT: Users and installers of this product are responsible for ensuring that use of this product complies with all national, state, and local laws and statutes related to monitoring and recording audio and video signals. SECO-LARM will not be held responsible for the use of this product in violation of any current laws or statutes.

WARNING: Stop using the camera if you see a malfunction such as smoke or unusual heat, as it could cause fire or electric shock. Do not open the case of this device, as there are no user-serviceable components inside.

FCC COMPLIANCE STATEMENT: Information to the user: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his or her own expense.

WARRANTY: This SECO-LARM product is warranted against defects in material and workmanship while used in normal service for a period of three (3) years from the date of sale to the original consumer customer. SECO-LARM's obligation is limited to the repair or replacement of any defective part if the unit is returned, transportation prepaid, to SECO-LARM. This Warranty is void if damage is caused by or attributed to acts of God, physical or electrical misuse or abuse, neglect, repair or alteration, improper or abnormal usage, or faulty installation, or if for any other reason SECO-LARM determines that such equipment is not operating properly as a result of causes other than defects in material and workmanship. The sole obligation of SECO-LARM, and the purchaser's exclusive remedy, shall be limited to replacement or repair only, at SECO-LARM's option. In no event shall SECO-LARM be liable for any special, collateral, incidental, or consequential personal or property damages of any kind to the purchaser or anyone else.

NOTICE: The information and specifications printed in this manual are current at the time of publication. However, the SECO-LARM policy is one of continual development and improvement. For this reason, SECO-LARM reserves the right to change specifications without notice. SECO-LARM is also not responsible for misprints or typographical errors. Copyright © 2014 SECO-LARM U.S.A., Inc.
